

RDC Business Solutions

Architects of Digital Strategy & Transformation

We do Business Intelligence Engineering

Premise

Organizations must learn to be agile. They must learn to respond quickly to change and react without hesitation to exploit new opportunities. RDC has helped organizations across the country to improve, compete and flourish in a real-time economy.

Services

Solution Assessments –

Organizations now have the widest selection of business intelligence tools ever available. Yet Qlik, Tableau, Power BI, WebFOCUS and the like can compete against each other in your organization – or they can harmonize to deliver unparalleled access to data.

Portal Development – Internal and client-facing use. On-Premises, SAAS and Cloud deployment models. Portals offer an extraordinary canvas for data visualization.

Report Development – Row and column reporting remains ever-important. The key is to empower the user community to create, and thus reduce the burden on IT.

Data Warehousing – Position and transform data for easy and wide access which enables better decision making across the enterprise.

Project Management – Prioritize efforts to do the right projects first, then manage to scope, budget and timeline.

Staff Supplementation – Lend a hand, short-term or long to fill resource and skill gaps at an attractive rate.

BIE & “A-T-A”

Businesses today face a myriad of challenges when competing in this ultra-demanding real-time, immediate economy. Business Intelligence Engineering (BIE) embodies *Analyzing* an organization's digital strategy, *Transforming* the current state to align with management's initiatives, and *Achieving* results through the adoption of enabling technologies to be leveraged by a company's personnel . . . all in pursuit of an organization's goals and objectives.

RDC Overview

We specialize in the engineering and development of business intelligence applications and data warehouses. Our mission is to help organizations across the United States leverage their investment in information delivery technologies, using today's most common business intelligence and data warehousing tools from Microsoft, IBM, Oracle, Information Builders, MicroStrategy, Informatika, Qlik, Tableau and others.

No matter the tool or technology, RDC offers a wide range of BIE services including solution assessments, project management, and

staffing. RDC's creativity in problem solving and flexibility in price point allows our team of experts to work within the constraints of most any budget.

The solutions we have crafted, independently and in concert with our partner network, have helped organizations across the country improve decision-making, operate more efficiently and maximize profits.

We do this with the application of only a modest margin, meaning RDC offers favorable rates for the best IT consulting services across the nation.

Whether it's an executive dashboard, report writing, analytics or a focus on data quality . . . Bringing an organization's data to life via the Web is what we do!

RDC Delivers

Having implemented hundreds of projects in Healthcare, Manufacturing, Retail, Financial Services, Insurance and more . . .

Our track record demonstrates that RDC has the depth and breadth of experience to engineer and deliver digital strategies, then implement transformational solutions which assist an organization's personnel in achieving desired results.

Impressively, RDC's entrepreneurial spirit and engineering skill are well represented in our own, unique QuikMetrix Portal. Designed for rapid deployment, this metadata-driven solution for Key Performance Indicators (KPIs) requires no development and no data warehouse. Visit www.quikmetrix.com for more information.
